## Why ABS EffeX?

### PREMIUM EFFICIENCY

**Within the next few years, the use of premium-efficiency motors in pumps and certain other equipment will be mandatory in many countries. Legislation is being introduced to significantly reduce energy consumption, energy costs and CO2 emissions.**

Our ABS EffeX range sets new standards when it comes to optimum energy efficiency. As it incorporates the first premium-efficiency IE3 motor designed and tested in accordance with IEC60034-30 together with an optimised hydraulics, the new ABS EffeX range gives the best total efficiency available on the market today.

[Long-term reliability »](#)  
[Greater energy saving](#)  
[Excellent rag handling](#)  
[Future-proof design »](#)  
[Sustainable in manufacture and operation »](#)

### Quick facts

**IE3 for the entire range**  
 All ABS EffeX models comply fully to the premium efficiency standard IE3. Every pump has been designed for optimal efficiency and legislation in mind, from motor to improved hydraulics.
